SKILLS

CIW Javascript Specialist Certified (2023)

CIW HTML & CSS Specialist Certified (2023)

Global and State Seal of Bi-Literacy (French)

Projects

Two-Stage Model Rocket (Composite Build)

A high-power rocket featuring a dual-stage ignition system. The airframe will utilize 3D-printed components for precision aerodynamics, powered by "rocket candy" (potassium nitrate and sugar) propellant.

NASA-Sponsored Weather Balloon Research

A collaborative contribution to Mississippi State University's atmospheric research program. I will assist in the design or data analysis of payloads launched via high-altitude weather balloons to study atmospheric conditions.

Python Rocket Trajectory Simulator

Developed a simulation tool using the RocketPy library to predict rocket flight paths. The program utilizes the Barrowman equations to calculate stability and performance metrics for professional documentation.
